

## SAP Accelerators by Syniti

### Implementation Quick Start Guide

This is a guide to the implementation of the following products (collectively referred to as SAP Accelerators):

- SAP Information Steward Accelerator by Syniti
- SAP Advanced Data Migration by Syniti

**NOTE:** These manuals are included with the setup files, except for the Syniti SAP Fiori Management Dashboard Deployment Guide, which can be downloaded from the SAP Service Marketplace.

1. **Assess and set up hardware and software** to ensure the hardware and software requirements are met.

Refer to the *SAP Accelerators by Syniti Software Requirements and Hardware Sizing Guide*.

2. **Install the SAP Accelerators** by Syniti.

Refer to the *SAP Accelerators by Syniti Installation and Upgrade Manual*.

3. **Configure the SAP Accelerators** by Syniti.

Refer to the *SAP Accelerators by Syniti Operations Guide* for information about setting security and performing other operations.

**Optional:** For the implementation of the SAP Fiori Management Dashboard application on the SAP HANA Cloud Platform (HCP), complete the steps above relative to the SAP Accelerator being implemented.

Refer to the *Syniti SAP Fiori Management Dashboard Deployment Guide*.
