## Introduction

This document applies to Syniti Solutions Master Data Management (formerly dspConduct™), and details the SAP Function Modules that are used by Master Data Management to extract and load data into the target SAP system.

**NOTE:** The DSP Namespace Transports located in %DSP Installed Path%\Web\UserArea\0151a30b-2dd0-48ae-823d-d378e1ff5c05\SAP\_Transports\Namespace must be installed in the target SAP system first, then the Master Data Management Transports can be installed.

**NOTE:** Beginning with the 7.0.5 release of the DSP, the Master Data Management Transports are no longer delivered with the installation files. They may be requested by opening a ticket with Syniti Support.

**NOTE:** The installation order of the Master Data Management Transports is described in the Master Data Management Transports Deployment Guide.

**NOTE:** SAP ECC Master Data Management Transports are supported for component SAP\_BASIS version greater or equal to 740. To verify availability for lower versions, please open a ticket to Syniti Support.

### Transport RD2K9A00WO (NameSpace)

**NOTE:** If the import of RD2K9A00WO fails, follow these steps:

1. If RD2K9A00WO fails with missing ZMSTR0, install the RD2K9A00W4 transport and then install RD2K9A00WO again.
2. If RD2K9A00WO fails with missing PHFLG, contact BackOffice Associates® Support for transport RD2K9A00WF, install the RD2KA00WF transport and then install RD2K9A00WO again.
